DRIVE-THRU HEADSET SYSTEM

OVERVIEW

The NEW Standard for Drive-Thru Communications. The magic is in the details!

FEATURES

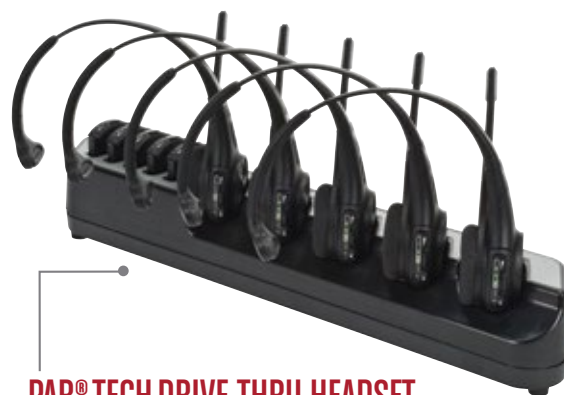

- The Par® tech headset is designed so you can service and make key repairs like replacing the headband, in store in seconds — no downtime
- The digital sound quality is better than ever thanks to enhanced mic technology that improves sound clarity and reduces background noise
- Enjoy minimal repairs with the most durable headset ever. Touch buttons and no on-off switch provide fewer moving parts and more reliability
- Improved comfort for the whole team with less weight and easy adjustments.
- Touch buttons provide haptics feel — a small vibration when touched, to make sure no one misses a beat
- Communicate the right messages to the right crew member with confidence. Each headset can have its own colortag for easy identification by the team
