

## EDGE LIT LED WINDOW SIGN

### OVERVIEW

LED sign technology provides an environmentally sound and cost effective solution for signage. LED lighting systems consume less power, require less maintenance, and last longer than neon or fluorescent technologies.

Edge-lit LED signs are an attractive and innovative way of advertising your brand.

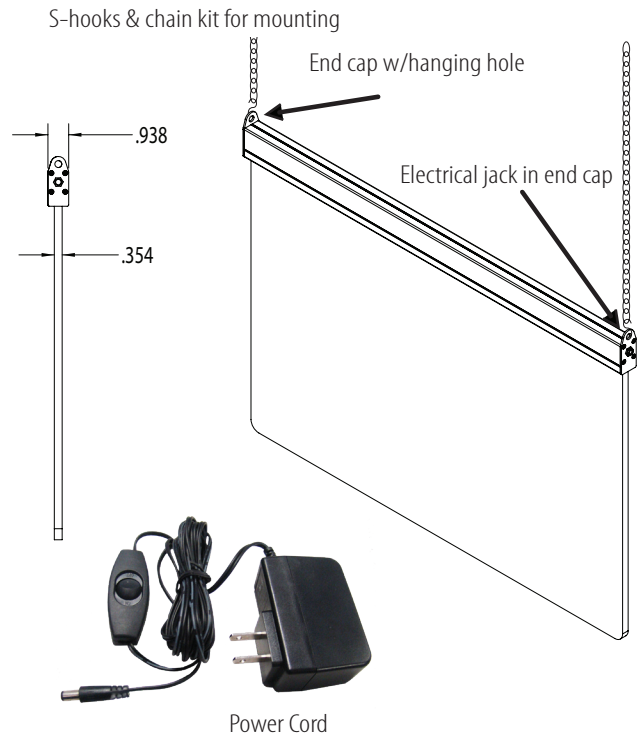

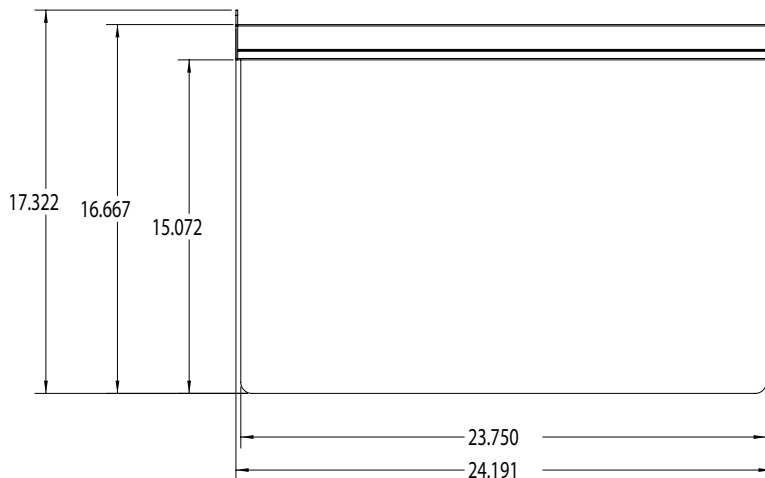

Howard's dynamic, edge lit LED window signs are the new "green" alternative, and the most eye-catching and stylish signage options available in the industry.

### FEATURES

- Acrylic combined with a special painting process for high visibility - day or night
- Premium LED light source with a slim housing
- Safe and efficient with low energy consumption compared to neon
- Low-maintenance, easy-to-clean with a soft cloth
- No hard wiring required - simply plug into a standard outlet
- Includes s-hooks and chain kit for mounting

# EDGE LIT LED WINDOW SIGN

## SPECIFICATIONS
